Preface

The present book, LAW & JUSTICE, General English for Law Students, is intended to be utilized for university students who need to be familiar with law texts in general sense before taking the Specialized Law Texts courses. Like many ESP course books, this book provides a wide variety of legal terminology and vocabulary in interesting, comprehensible, and easy-to-follow context.

The texts are selected from different sources via Internet. The authors have tried to do their best to design the book in a way to develop and stimulate motivation on the part of the students towards English Language.

The passages are authentic from various topics related to the concept of Law, from definition to some practical materials in this regard. Exercises are designed to provide the opportunity for students to challenge their knowledge of English and to obtain the best result of their challenge.

There are no strict and deductive grammatical points in this book; instead students are provided with a variety of parts of speech exercises to get familiar with the function and meaning of different words as well as various suffixes. Moreover, they can figure out the parts of the different parts of speech in English sentences.

"Have Fun" sections contain some short, strange and funny stories related to the concept of law. Reading these parts, students have the opportunity to enjoy and learn more new words and recycle the previous ones.

All the book chapters have been pretested before publication in order to minimize the problems. The feedback we have received from Law students during and after the pretesting indicates that the covered materials contribute to better understanding and learning of Specialized Legal Texts.

No work is perfect and we welcome any comments and suggestions to improve the work. So, please be kind to us and inform us of your invaluable comments.
