قیمت: ۴۵۰۰۰ ریال

Preface

This book provides useful practice in basic and practical English grammar along with some interesting and communicative passages. As a matter of fact, teaching sheer grammar has always been an exhausting task for both teachers and students. That's the very reason why I intended to present very short grammatical explanations in an easy way and some readings so that students won't get bored and would be able to stabilize the grammatical points in their minds.

In fact, the grammar sections begin by showing how a structure is used and then take students from controlled practice to use of the structure in a communicative context.

Students are exposed to a variety of exercises. They are also motivated to make use of their own dictionaries which is undeniably a significant skill.

One more thing which is worth mentioning, this book provides merely those grammatical points which based on my own years of experience considered to be of great priority. Teachers often feel overworked in term time. Thus, the target of this book is not to teach all aspects of English grammar but it is planned in a way that students can go through all the chapters in the course of one semester.

Teachers are highly recommended to teach part 1 (the grammar section) along with part 2 (the texts) simultaneously.

I hope this book will fulfill the very special needs of university students and those who are willing to find a book to start studying English in a practical way. I also appreciate any comments or opinions by those who are involved in language learning and teaching.

I would also like to thank Mr S. Yusef Mirmorsali to Whom I am indebted because of his helpful advice and many valuable suggestions.

Poormohammad
