Acknowledgements

A number of people have helped make this book possible. They include Dr. Ahmad Mohseni who provided the opportunity and encouragement to explore these ideas. Mr. Ali Esmaili of Melbourne University gave the most careful reading of the book, and advice based on years of experience; and without his excellent assistance, none of the materials would have been developed. I also feel compelled to mention Mrs. Nazeri for publishing and creating an enjoyable environment for writing books. And finally without both the technical and emotional support of my mother and father the book would not have been started or finished.

Preface

This book tries to familiarize potential candidates of the IELTS test with the probable topics of Essay writing (both Academic and General Writing module) with the sample essays written by the candidates, which are analyzed for further investigation. At the end of the book there have been some topics for the students to practice essay writing.

The main purpose of this book is to enhance your ability to improve your Essay writing by reflecting on the different samples; and to help you obtain a higher band score in IELTS writing Task 2. The sample topics give you a broad idea of how to write Essay and provide you with a variety of essential words, phrases, collocations, and cohesive devices.

Although this book is designed as a self-study book, it can also be used in IELTS preparation classes. Teachers may work on these topics and may ask students to write their own writings using the phrases and collocations used in the samples.

The following are suggested if you seek to use the book more efficiently;

- Read the writings and pay attention to the styles and patterns.
- Try to pick some essential words, phrases, and collocations and merge them with your ideas. Then, practice writing about the related topics. Trying to use most of words, phrases, and the cohesive devices to accurately, and cohesively show a good command of the language.
- Try to get psychologically ready and rid of any inhibitions you may be feeling.

At the end, I wish you success and hope you would find this book helpful.

Regards,
Adnan Satariyan
