Introduction

The reading passages in this book, each followed by 8 or 10 multiple-choice items, are arranged in a graded series, the grading being based on an assessment of difficulty level in terms of vocabulary, syntax and thought-content. A quick comparison of the first passage with the last one gives you an idea of the initial level assumed and the final level aimed at. The passages are designed for the learners who want to strengthen their reading skills for academic, personal or career purposes. This book is a great help for the university students to use it in “Reading 1”, “Reading 2” and “Reading 3” as a complementary one.

Finally, we wish to express our deepest gratitude to our colleagues and friends who have contributed to this piece of work.

Shahrokh Jahandar

Mohammadreza Khodareza
