دانشگاهی • همدان: روزاندیش - دانشجو

Introduction

We wrote this book with the hope that it would fill a specific niche in the education of the nursing students. Our goal is to improve all four skills required by the nurses in their profession. It has been designed to be useful for the ESP course of university nursing students who are studying English as a second or foreign language. This book was authored based on a Needs Analysis survey which was collected from the target sample comprising, nursing instructors, nurses, and nursing students. It was shown that they believed that nearly all four skills are required for their profession but they gave different amount of weight to each skill. Therefore, this book contains 14 lessons comprising different parts and all four skills:

1. Reading passage
2. Reading comprehension exercises
3. Increase your knowledge
4. Extensive reading
5. Writing
6. Listening
7. Speaking

The major features of this book that distinguish it from the existing books are that it has used authentic material from the Net or the books in this field; it is interactive in that it requires the students' cooperation in the teaching and learning process, also one unit has been devoted to reading scientific articles and the important features that should be paid attention while reading an article . In "Increase your knowledge" there are a variety of exercises which help the nursing students to learn different terms and idioms in their field of study. In the "Extensive reading" part, different tasks have been designed which are necessary for a student to be able to do, such as translation, outlining, summarizing, explaining, and instructing. Moreover, in the "Writing" section, Different types of paragraphs, formal email, and CV have been introduced. In the listening part different short movies have been selected which are about situations that a nurse may encounter during her/his career, for example, how to take blood pressure, skin and burn, sleep apnea, suture removal, etc. The movies are in the CD accompanying this book. This part can be done as an out of classroom activity so that the students have enough time to devote to it. Finally,

the “Speaking” section provides situations that nurses may run into during their career and helps them to solve their problems by asking some questions as a guideline.

Finally, we would like to reiterate that our goal was to provide the nursing students with a readable, interesting, interactive, and scientifically grounded book in order to help them improve their language skills required for their profession. We hope that you and your students enjoy teaching and learning with “*English for Nursing Students*”. If you have any comments on this book, we’d love to hear them. You can email us at:

Table of Contents

Unites	Title	Page
1	Nursing	1
2	Physical assessment	10
3	Communication	20
4	Sleep	29
5	Oxygen therapy	39
6	Intravenous infusion	49
7	Medical errors	59
8	Hemodialysis	69
9	Bedsore	79
10	Brain	89
11	Diabetes	101
12	Mental disorder	110
13	Emergency room	121
14	Brief article	130
	Glossary	140
	Appendix 1: Word Roots	148
	Appendix 2: Suffixes	150
	Appendix 3: Prefixes	151
	Appendix 4: Cardiovascular system	151
	Appendix 5: Digestive system	153
	Appendix 6: Endocrine system	154
	Appendix 7: Male and female reproductive system	155
	Appendix 8: Lymphatic system	156
	Appendix 9: Musculoskeletal system	157
	Appendix 10: Nervous system	158
	Appendix 11: Respiratory system	159
	Appendix 12: Skin and sense organ system	160
	Appendix 13: Urinary system	161
