	Test yourself.....	136
	Answer key	138

Preface

This book is written for general psychology college students. The materials are free internet based texts. In any discipline there are specific terminologies that scholars use to communicate with one another, so in this book, some general psychological texts are provided with the meanings of the terms in English. Translations in Farsi and testing yourselves are presented with the purpose of helping students with the feedback.

Of course there are some obstacles. The author will greatly appreciate any comments from interested readers to improve the book.

The answers to the tests are provided at the end of the book.
