Author

Dr.Farzad Ebrahimi

Imam Khomeini international university

سرشناسه	: ابراهیمی، فرزاد، ۱۳۵۸ - Ebrahimi, Farzad
عنوان و نام پدیدآور	: Mechanics of graphene nanostructures[Book]/ author Farzad Ebrahimi.
مشخصات نشر	: قزوین: دانشگاه بین‌المللی امام خمینی(ره)، انتشارات، ۱۳۹۹ = ۲۰۲۰ م.
مشخصات ظاهری	: ۶۲۲ص.
شابک	: ۹۷۸-۶۲۲-۶۸۹۸۳۱-۷
وضعیت فهرست نویسی	: فیا
یادداشت	: انگلیسی.
موضوع	: گرافین
موضوع	: Graphene
موضوع	: مهندسی مکانیک
موضوع	: Mechanical engineering
موضوع	: نانو ساختارها
موضوع	: Nanostructures
موضوع	: زبان انگلیسی -- کتاب‌های قرانت -- مهندسی مکانیک
موضوع	: English language -- Readers -- Mechanical engineering
شناسه افزوده	: دانشگاه بین‌المللی امام خمینی(ره). انتشارات
رده بندی کنگره	: ۵۴۹/۲۷
رده بندی دیویی	: ۵۴۹/۲۷
شماره کتابشناسی ملی	: ۶۲۱۷۰۸۳

عنوان : Mechanics of Graphene nanostructures

نویسنده : فرزاد ابراهیمی

ناظر فنی : حمید کلهر

شابک : ۹۷۸-۶۲۲-۶۸۹۸-۳۱-۷

نوبت چاپ : اول ۱۳۹۹

قیمت : ۹۵ هزار تومان

شمارگان : ۵۰۰ جلد

ناشر : انتشارات دانشگاه بین‌المللی امام خمینی (ره)

قزوین، دانشگاه بین‌المللی امام خمینی(ره)، تلفن ۳۳۹۰۱۴۲۶ - ۰۲۸

Contents

Section I - Introduction to Graphene nanostructures	1
1. 1. History of graphene.....	3
1. 2. Graphene 2D-Crystals.....	6
1. 3. Graphene Properties	9
14. Main Preparation Methods of Graphene	11
Section II – Mechanics of Single-layered Graphene sheets (SLGS)	27
Chapter 1: Static Stability of SLGS in humid-thermal environment	29
2.1.1. Background	32
2.1.2. Governing equations	33
2.1.3. Solution by Galerkin's method	41
2.1.4. Numerical results and discussions	46
2.1.5. Conclusions.....	52
Chapter 2: Vibration analysis of SLGS.....	55
2.2.1. Background	57
2.2.2. Governing equations	58
2.2.3. Solution by DQM.....	66
2.2.4. Numerical results and discussions	72
2.2.5. Conclusions.....	81
Chapter 3: Vibration analysis of viscoelastic SLGS in thermal environment	83

2.3.1. Background	85
2.3.2. Governing equations	86
2.3.3. Solution by DQM.....	94
2.3.4. Numerical results and discussions	100
2.3.5. Conclusions.....	110
Chapter 4: Magnetic field effects on vibration characteristics of SLGS	113
2.4.1. Background	115
2.4.2. Governing equations	116
2.4.3. Solution by Galerkin's method.....	126
2.4.4. Numerical results and discussions	130
2.4.5. Conclusions.....	138
Chapter 5: Vibration analysis of SLGS under non-uniform loads.....	141
2.5.1. Background	143
2.5.2. Governing equations	144
2.5.3. Solution by Galerkin's method	152
2.5.4. Numerical results and discussions	157
2.5.5. Conclusions.....	166
Chapter 6: Dynamic Characteristics of SLGS under in-plane mechanics loads	167
2.6.1. Background	169
2.6.2. Governing equations	170

2.6.3. Solution by Galerkin's method	178
2.6.4. Numerical results and discussions	183
2.6.5. Conclusions.....	192
Chapter 7: Dynamic modeling of SLGS-mass sensors.....	195
2.7.1. Background	197
2.7.2. Governing equations	198
2.7.3. Solution by Galerkin's method	206
2.7.4. Numerical results and discussions	210
2.7.5. Conclusions.....	217
Chapter 8: Thermal environment effects on dynamic characteristics of SLGS-mass sensors.....	223
2.8.1. Background.....	225
2.8.2. Nonlocal strain gradient nanoplate model	226
2.8.3. Governing equations	227
2.8.4. Solution by Galerkin's method	237
2.8.5. Numerical results and discussions	242
2.8.6. Conclusions.....	251
Chapter 9: Wave dispersion characteristics of SLGS rested on elastic medium.....	253
2.9.1. Background	255
2.9.2. Theory and formulation	256
2.9.3. Analytical solution	265

2.9.4. Results and discussion	266
2.9.5. Conclusion	276
Chapter 10: Viscoelastic foundation effects on wave dispersion characteristics of SLGS.....	277
2.10.1. Background	279
2.10.2. Theory and formulation	280
2.10.3. Analytical solution	289
2.10.4. Results and discussion	290
2.10.5. Conclusion	297
Chapter 11: Humid-thermal environment effects on wave dispersion characteristics of SLGS.....	299
2.11.1. Background	301
2.11.2. Theory and formulation	302
2.11.3. Analytical solution	312
2.11.4. Results and discussion	313
2.11.5. Conclusion	318
Chapter 12: Magnetic field effects on wave dispersion characteristics of SLGS.....	321
2.12.1. Background	323
2.12.2. Theory and formulation	324
2.12.3. Analytical solution	333
2.12.4. Results and discussion	335

2.12.5. Conclusion	340
--------------------------	-----

- Escape frequency diminishes gradually as nonlocality increases. Also, higher escape frequencies can be achieved by utilizing greater length scale parameters.344

2.12.6. Appendix	345
------------------------	-----

Chapter 13: Wave dispersion characteristics of SLGS under in-plane mechanical loads	347
---	-----

2.13.1. Background	349
--------------------------	-----

2.13.2. Theory and formulation	350
--------------------------------------	-----

2.3.3. Analytical solution	359
----------------------------------	-----

2.13.4. Results and discussion	361
--------------------------------------	-----

2.13.5. Conclusion	369
--------------------------	-----

2.13.6. Appendix	370
------------------------	-----

Chapter 14: Various shear deformation plate theories for wave dispersion analysis of SLGS	371
---	-----

2.14.1. Background	373
--------------------------	-----

2.14.2. Theory and formulation	374
--------------------------------------	-----

2.14.3. Dispersion relations.....	385
-----------------------------------	-----

2.14.4. Numerical results and discussions	387
---	-----

2.14.5. Conclusion	400
--------------------------	-----

2.14.6 Appendix.....	400
----------------------	-----

Section III- Mechanics of double-layered graphene sheets (DLGSS) ...	403
--	-----

Chapter 1: Static stability analysis of DLGSS in humid-thermal environment	405
3.1.1. Background	407
3.1.2. Governing equations	408
3.1.3. Solution by Galerkin's method	418
3.1.4. Numerical results and discussions	424
Chapter 2: Vibration analysis of DLGSS in humid-thermal environment	435
3.2.1. Background	437
3.2.2. Theoretical formulation.....	438
3.2.3. Solution by Galerkin's method	448
3.2.4. Numerical results and discussions	453
3.2.5. Conclusions.....	462
Chapter 3: Vibration analysis of visco-elastically coupled DLGSS ..	465
3.3.1. Background	467
3.3.2. Governing equations	468
3.3.3. Solution by Galerkin's method	478
3.3.4. Numerical results and discussions	483
3.3.5. Conclusions.....	493
Chapter 4: Dynamic characteristics of DLGSS under in-plane mechanical loads	495
3.4.1. Background	497

3.4.2. Governing equations	498
3.4.3. Solution by Galerkin's method	508
3.4.4. Numerical results and discussions	513
3.4.5. Conclusions	521
Chapter 5: Wave dispersion characteristics DLGSS rested on elastic medium.....	525
3.5.1. Background	527
3.5.2. Theory and formulation	528
3.5.3. Analytical solution	533
3.5.4. Results and discussion	535
3.5.5. Conclusion	544
3.5.6. Appendix.....	545
Chapter 6: Viscoelastic foundation effects on wave dispersion characteristics of axially loaded DLGSS	547
3.6.1. Background	549
3.6.2. Theory and formulation	550
3.6.3. Analytical solution	556
3.6.4. Results and discussion	558
3.6.5. Appendix.....	574
Chapter 7: Humid-thermal environment effects on wave dispersion characteristics DLGSS	575
3.7.1. Background	577

3.7.2. Theory and formulation	578
3.7.3. Analytical solution	585
3.7.4. External forces	586
3.7.5. Results and discussion	587
3.7.6. Conclusion	597
3.7.7. Appendix	598
References	599
