Preface

There are many different reasons for people to learn English as a second language including business advancements and personal communication. Regardless of these reasons, it is important to know and understand your learning option. Having this knowledge will enable a person to make the best decision regarding how he or she is going to learn English.

Basic English is an attempt aimed at improving students' reading skills and teaching them some essential vocabularies and grammar rules.

It consists of ten units. Each unit begins with three pre – reading questions which are designed to motivate students to read through the texts. These questions are followed by the definition of the new words. Studies have proved that reading comprehension and vocabulary knowledge are strongly correlated. By reading, students improve their vocabularies which in turn helps them comprehend more. The next section belongs to structure and grammar. Both reading and grammar sections provide the students with various exercises which help them improve their reading proficiency, vocabulary knowledge and knowledge of the structure of the sentences.
