Introduction

English for the students of physical education is a response to learners needs for specific English reference material. This book intends to give the students of physical education the chance to improve their reading skills though reading high-interest relevant academic passages from different content areas within the physical education major. The book aims at covering all major branches of physical education including management, physiology, motor learning, biomechanics and corrective feedback, and general physical education. Therefore, it can be a valuable resource book that boosts learners English skills especially for students who prepare to take part in MA exam.

The book primarily focuses on reading skill, but at the same time it improves reader's grammar and vocabulary knowledge. With the dual focus of better equipping students to interact with academic texts and helping them fully acquire vital academic vocabulary, *English for the students of physical education* gives students the tools they need to succeed in their academic careers. It is hoped that students find this book interesting and useful.

The authors would like to thank a bunch of people who were great help in writing this book including Mr. Hasanzadeh and Kowsary from Khate Sefid Press and Ms. Tayebi for designing the book.
