Common error	104
Sequencing words.....	105

Introduction

Who is this book for?

This book is intended for:

- Adult students who had a basic knowledge of English earlier in their life and decide to start learning again
- Teachers of adult learners who are searching for a quick and easy book to teach

Why this book?

As a English learner I always struggle with myself on how go through my English books to be successful in listening, reading, writing, and speaking in another language and more willing to think in English. Now that I am an English teacher my challenges moved toward my students. I tried out many books in different language institutes. Sometimes I integrated different techniques from various English book. But still unsuccessful. Later, decided to go on my way, to stand on my foot, and to have my book.

What this book contains?

Instead of dividing the book into different units, I arranged it in ten sessions; the content of each session are related semantically. However, there is no force to cover one chapter in one session. I did my best to apposed all the concepts that are linked to each other in real word. When you make sure that you or your students master a session you can move gently to other sessions. There are four major parts, including vocabulary booster, speaking, grammar, and listening. With regard to complexity of each session, two to four parts are accommodated in each session; moreover, four three stories are accommodated throughout the sessions.
