1- Introduction

Welcome to

Learn American Idioms Through Conversations

This book is designed especially for people who are intermediate or advanced speakers of English, but want to improve their listening and speaking skills.

There will be 48 different topics for you. We try to talk about topics that you will find interesting. All of them use "real English" the normal, everyday English you will find among native speakers in the United States. It is a way to listen to real native speakers talking as they do everyday in English.

There are three parts to every conversation: After a brief introduction, there is a discussion or dialog of the topic of the day. This usually lasts 3-6 minutes. In part 2, there is an explanation of the vocabulary and expressions used during part 1.We explain how certain words and phrases are used by native speakers, including both formal and informal expressions. And in part three you will hear the conversation in normal native speaker.

It is a production of the Center for Educational Development ,in Los Angeles,California.The speaker is Dr. Jeff McQuillan,
