God creates you & makes you to die. While some of you have long life & become old until where you forgot everything. God is aware & able. (Nahl Surah, Verse ٧٠). (Emotional & social protection is the most need of an elderly; (specially the forgetful elderly).

All of us are children of an elderly & must learn to our children to be kind with their grandparents because it is the path which all of us will pass. Attention & prevention are the most principles in the treatment of an elderly. According to psychiatrist; children & grandchildren must talk to the elderlies & not let them to forget their daily life & important things as well as prevent from the forgetfulness disorder or to control it.

According to that, this story tries to train an interaction of this kind between the forgetful grandfather & his grandchild. It is hoped to be able to learn & train the benevolent culture among the children of this land.

Thanks to all dears who help me to write this story & special thanks to Mrs Masome Mosaei & Nina Farshadi..

BEST REGARDS!
Haji Yousefi Azam

Dedicated to all dears who make the sweetest memories for us but they have forget it.
