Preface

Lippincott's Illustrated Reviews: Biochemistry integrates and summarizes the essentials of medical biochemistry for (1) students in the health-related professions who are preparing for licensure examination [for example, the United States Medical Licensure Examination (USMLE) Step 1], and (2) professionals who wish to review or update their knowledge in this rapidly expanding area of biomedical science. The Illustrated Review uses an information-intensive, outline format along with summary figures and practice questions to teach this complex material.

Acknowledgments

We are grateful to the many friends and colleagues who generously contributed their time and effort to help us make this book as accurate and as useful as possible. The support of our other colleagues at the University of Medicine and Dentistry of New Jersey—Robert Wood Johnson Medical School is highly valued. We owe special thanks to our Chairman, Dr. Masayori Inouye, who has encouraged us over the years in this and other teaching projects. We also appreciate the many helpful comments of Dr. Åke Rökæus.

Without talented artists, an Illustrated Review would be impossible, and we have been particularly fortunate in working with Michael Cooper throughout this project. His artistic sense and computer graphics expertise have greatly added to our ability to bring biochemistry "stories" alive for our readers.

The editors and production staff of Lippincott Williams & Wilkins were a constant source of encouragement and discipline. We particularly want to acknowledge the tremendously helpful, supportive, and creative contributions of our editor, Nancy Duffy, whose imagination and positive attitude helped us bring this complex project to completion. Final editing and assembly of the book has been greatly enhanced through the efforts of Jennifer Glazer.

Contents

UNIT I: Protein Structure and Function

- Chapter 1: Amino Acids 1
 - Chapter 2: Structure of Proteins 13
 - Chapter 3: Globular Proteins 25
 - Chapter 4: Fibrous Proteins 43
 - Chapter 5: Enzymes 53
-

UNIT II: Intermediary Metabolism

- Chapter 6: Bioenergetics and Oxidative Phosphorylation 69
 - Chapter 7: Introduction to Carbohydrates 83
 - Chapter 8: Glycolysis 91
 - Chapter 9: Tricarboxylic Acid Cycle 109
 - Chapter 10: Gluconeogenesis 117
 - Chapter 11: Glycogen Metabolism 125
 - Chapter 12: Metabolism of Monosaccharides and Disaccharides 137
 - Chapter 13: Pentose Phosphate Pathway and NADPH 145
 - Chapter 14: Glycosaminoglycans and Glycoproteins 157
-

UNIT III: Lipid Metabolism

- Chapter 15: Metabolism of Dietary Lipids 173
 - Chapter 16: Fatty Acid and Triacylglycerol Metabolism 181
 - Chapter 17: Complex Lipid Metabolism 201
 - Chapter 18: Cholesterol and Steroid Metabolism 219
-

UNIT IV: Nitrogen Metabolism

- Chapter 19: Amino Acids: Disposal of Nitrogen 245
 - Chapter 20: Amino Acid Degradation and Synthesis 261
 - Chapter 21: Conversion of Amino Acids to Specialized Products 277
 - Chapter 22: Nucleotide Metabolism 291
-

UNIT V: Integration of Metabolism

- Chapter 23: Metabolic Effects of Insulin and Glucagon 307
 - Chapter 24: The Feed/Fast Cycle 321
 - Chapter 25: Diabetes Mellitus 337
 - Chapter 26: Obesity 349
 - Chapter 27: Nutrition 357
 - Chapter 28: Vitamins 373
-

UNIT VI: Storage and Expression of Genetic Information

- Chapter 29: DNA Structure, Replication and Repair 395
 - Chapter 30: RNA Structure, Synthesis and Processing 417
 - Chapter 31: Protein Synthesis 431
 - Chapter 32: Regulation of Gene Expression 449
 - Chapter 33: Biotechnology and Human Disease 465
-
