Preface

The significance of preparation for IELTS writing topic ideas is unmaintained in many study schemes for IELTS while acquiring structure and vocabulary is accented, though heightened result entails amalgamation of both the former and latter domains.

This book betters those currently available in market as students will embark on employing eminent opinions and vocabularies without feeling exhausted in the completion of their task. Such ease is attained by peeling the layers of the book "The best preparation for IELTS: Writing academic module band 9" by Ryan Wright. While the book itself is intended primarily for those targeting band 9, this concise review streamlines earning the vertex of IELTS writing task 2 for those aiming at band 7+. Further, being imbued with mere ideas would scare those with lower target band.

The ideas are exhibited as full sentences in divided topics, denoting that enhanced progress in writing demands not only tangled mesh of words, but group of vocabularies to reproduce language naturally and validly at a quality comparable to native speakers. Chapter one houses ideas for IELTS topics containing topic based vocabularies, collocations, phrases, phrasal verb, proverbs and idioms whose meaning will be provided in the following chapter. In the third Chapter, essential functional phrases to shape the essay framework are employed while the embodiment of the material discussed is bestowed in the index of this study through Ryan's selected essay samples.

This review comes as a result of my aspiration for excellence in IELTS composition task which could merely be indulged in Ryan's writing materials. I hope the components of this study ascend you to your ideal target band. In case you find any deficiency, kindly guide me to improve it in the future editions. I appreciate your feedback.
