Preface

This book has been authorized with the intention of strengthening the English abilities of computer and information technology students. It has been tried to select specialized texts relevant to modern issues in the above mentioned fields. It is thought that this can lead to students' better understanding of their texts and enhancement of vocabulary. To achieve to as such purpose, some fourteen sections have been provided. ESP is accounted to be among the important topics in entrance exams. To realize this intention, some of the questions of public and Azad Universities along with their answers have presented to students.

Prior to anything we express our thanks to God. We are grateful to all of our friends who aided in preparing the work as well. Besides these, we deeply appreciate *Mr. Hamzeh Parsi Nejad*, the cover designer. The effort has been centralized on presenting a work away from faults; however, we are eagerly interested in receiving any comments from the readers.

Special thanks go to *Mr. Mahmoudian*, the manager of 'Negah e Danesh' publication, and his colleagues who shouldered much effort to publish the present book.

Readers are asked to render their comments via the following addresses:

Behrouzian.e@gmail.com , Abbasrezae@gmail.com

Table of Contents

subject

page

Unit 1: History of Computer

Section 1 : History of Calculation.....	9
Section 2 : History of computer.....	13
Section 3 : Personal Computers	20

Unit 2: Anatomy of Computer

Section 1 : Inside the PC	25
Section 2 : Mother Board.....	28
Section 3: Hard Disk Drive (H.D.D).....	33

Unit 3: Input devices

Section 1 : Keyboard and Mouse.....	41
Section 2 : Other Pointing Devices.....	45
Section 3 : Scanners.....	48

Unit 4: Output Devices

Section 1 : Types of Printers.....	53
Section 2 : Computer Display Systems.....	60
Section 3 : Monitors.....	65

Unit 5: Microsoft Windows History

Section 1 : 1983 – 2000	73
Section 2 : 2001: Windows XP	79
Section 3 : Windows Vista	82

Unit 6: Programming

Section 1 : A Survey of Programming Techniques	87
Section 2: Object Oriented Programming.....	90
Section 3: Some Object-Oriented Languages	97

Unit 7: NET Framework Conceptual Overview

Section 1 : Overview	105
Section 2 : .NET Framework Class Library.....	109

Section 3 : ASP.net.....	111
--------------------------	-----

Unit 8: Database

Section 1 : History Of Database.....	119
Section 2 : Database models.....	123
Section 3 : Database Management Systems.....	130

Unit 9: Computer Networks

Section 1 : Computer Network History.....	135
Section 2 : Network types LAN, MAN, WAN.....	138
Section 3 : Fiber Optic.....	144

Unit 10: E – Mail

Section 1 : E-mail History.....	151
Section 2 : E-mail Protocols.....	156
Section 3 : SMTP and MAPI.....	160

Unit 11: Internet Firewall

Section 1 : What Is an Internet Firewall?.....	165
Section 2 : What Can a Firewall Do?.....	169
Section 3 : What Can't a Firewall Do?.....	172

Unit 12: Computer Viruses

Section 1 : viruses.....	179
Section 2 : Worms, Spams and Trojan Horse.....	183
Section 3 : Effects of a Trojan Horse.....	186

Unit 13: Expert Systems

Section 1 : Expert Systems Overview.....	191
Section 2 : Components of an Expert System.....	194

Unit 14: Electronic Learning

Section 1 : E-Learning Overview.....	203
Section 2 : technologies used in asynchronous E-learning.....	207

Appendix: Entrance Exams

Entrance Exams.....	212
