18	A Sweet Sickness <i>Causative sentences</i>	153
19	The Hitchhiker <i>Adjective clauses</i>	161
20	The American Pepper <i>Direct and indirect speech</i>	172

Preface

Most college students have probably spent time on learning English in high school or guidance school. However, it is still felt that another level, covering more information, is needed to refresh their mind in English reading comprehension and grammatical structures to handle their educational encounters in English.

Accordingly, we have tried to have a book in general English with texts for reading comprehension considering students' interests and the challenging topics in real life. Additionally, presenting some questions before starting the main part of the reading makes comprehension easy and prepares college students to detect the subject matter better. Also, the reading comprehension questions following each reading text have been developed in different types to develop students' comprehension of the passages.

Along with the reading comprehension section in each lesson, is a concise review of an important, frequent, and necessary grammatical structure in English. Included in the grammar section in each lesson are succinct and easily understood delineations, and numerous examples that serve as a model to avoid typical errors, and help their writing skill.

Besides, the vocabulary table at the beginning of each lesson helps to fill in the students' vocabulary gap in handling the reading comprehension tasks.

Thus, the present book, on one hand, presents a practical way for students to practice English to win over to study texts, and learn new vocabulary, and grammar. On the other hand, it tries to give teachers a suitable wherewithal for providing their students with practical contexts and exercises to learn English. It also whets their appetite for more practice to learn more English.
