Acknowledgments

There are always more people to thank than you ever have the space for. But the authors would like to extend their sincere gratitude to the following for making this book possible: A huge thanks to Ken Jones, Laura Sackerman, Jenny Moss Benson, and everyone else at Microsoft Press, as well as Nancy Sixsmith, Dan Whalen, and Rozanne Murphy Whalen—your Herculean efforts have not been missed. Also thanks to Kathy Blomstrom, content development manager for Solid Quality Learning, for her tireless work on the project and to Federico Bazo Alfaro for helping to keep the wheels moving.

In addition, the authors would like to acknowledge the following special people:

Daren Bieniek I would like to thank my mom (MaryAnn), wife (Shara), and daughter (Amelia) for tolerating all of those times that I said, “I can’t right now. I’m working.”

Mike Hotek I’d like to thank the SQL Server Development Team for creating a product that my life has revolved around for more than 15 years. Thanks to my sister Carrie, brother-in-law Dan, and nieces Tasha and Ashley for the support to keep going. I would have never made it here without my grandparents, whom I’ve always thought of as my other set of parents, for being a huge part of who I am today. Jen and Gabby, you have provided more smiles than you can ever imagine. Thank you to the many people at Sacred Heart in Eau Claire and Abbott Northwestern in Minneapolis for sending my best friend back—three times. There aren’t words in any language to adequately describe what you do every day. And thanks to my best friend—Dad.

Antonio Soto I need to thank my wife, Isabel, for her patience and understanding. She is my *raison d’être*. Thanks to Fernando Guerrero for placing his trust in me. Thanks to Marcelo Castelo for giving me the opportunity to work with him. Thanks to Solid Quality Learning for its warm welcome. And thanks to Mosqui for making me laugh in the bad moments.

Adolfo Wiernik I definitely must thank Fernando Guerrero, CEO of Solid Quality Learning, for believing in me from the start when I joined this amazing company. Thanks to Michael Rys, SQL Server Program Manager in charge of the XML features in the product, for his mentoring and always answering my mails. Finally, I thank the team at Magen, Microsoft Technology Center in Tel Aviv, Israel, which is where I started working with the XML features in SQL Server 2000 and laid the foundation for who I am.

About the Authors

MCTS Self-Paced Training Kit (Exam 70-431): Microsoft SQL Server 2005--Implementation and Maintenance was written by the following mentors with Solid Quality Learning, a trusted global provider of advanced education and solutions for the Microsoft SQL Server platform:

Daren Bienieć is a mentor with Solid Quality Learning, has 20 years of professional technical experience, and has served in nearly every IT role possible—from systems administrator to developer to database administrator to architect to CEO. During the past 10 years, Daren has focused on data-related roles and technologies, with an emphasis on very large database (VLDB) architecture, design, and implementation.

Randy Dyess is the author of *Transact-SQL Language Reference Guide* and many magazine and newsletter articles about SQL Server security and optimization issues, and has spoken at various international and national conferences. Randy is a member of the Board of Directors for the Professional Association for SQL Server (PASS) and is the Director of Programs for the North Texas SQL Server Users Group. He is also the founder and principle author of www.TransactSQL.com.

Mike Hotek has been working with SQL Server since before it was a Microsoft product. He is known throughout the industry for his expertise in replication, high availability, disaster recovery, and performance tuning. Mike has delivered more than 200 sessions at a variety of conferences and has coauthored two other books about SQL Server.

Javier Loria, a mentor with Solid Quality Learning, works primarily with Latin American companies to help them develop business intelligence projects. He is also a trainer and a frequent speaker at Microsoft regional events and loves to write about technology. When not working, Javier enjoys spending time with his wife, Maria, and his five children: Lidia, Javier Jose, Maria Jose, Andrea, and Lucia.

Adam Machanic is an independent database software consultant, writer, and speaker based in Boston, Massachusetts. He has implemented SQL Server solutions for a variety of high-availability online transaction processing (OLTP) and large-scale data warehouse applications, and also specializes in Microsoft .NET data access layer performance optimization. Adam is a Microsoft Most Valuable Professional (MVP) for SQL Server and a Microsoft Certified IT Professional.

Antonio Soto, a database fanatic, has been working with databases since 1994. He has worked with the IT training company Professional Training, in Spain, as a trainer and consultant regarding SQL Server and other Microsoft technologies. Since 2002, Antonio has also been a partner and director of Alcatraz Solutions, which provides security solutions to the IT industry. He writes for various magazines and speaks at many IT conferences in Spain. Antonio is a computer engineer, an MCDBA, an MCSE, an MCAD, and an MCT.

Adolfo Wiernik is director of operations for Solid Quality Learning in Latin America. He previously worked as lead architect at the Microsoft .NET Center in Central America and the Microsoft Technology Center in Tel Aviv, Israel. When not speaking at a local or international event, Adolfo enjoys hiking in the mountains in his home country of Costa Rica.

Contents at a Glance

1	Installing SQL Server 2005	1
2	Configuring SQL Server 2005.....	51
3	Creating Tables, Constraints, and User-Defined Types.....	103
4	Creating Indexes.....	147
5	Working with Transact-SQL	169
6	Creating Partitions.....	207
7	Implementing Views	237
8	Managing XML Data	255
9	Creating Functions, Stored Procedures, and Triggers.....	349
10	Working with Flat Files	379
11	Backing Up, Restoring, and Moving a Database.....	413
12	Using Transact-SQL to Manage Databases.....	447
13	Working with HTTP Endpoints	477
14	Working with SQL Server Agent Jobs.....	493
15	Monitoring and Troubleshooting SQL Server Performance	529
16	Managing Database Snapshots	601
17	Implementing Database Mirroring	615
18	Implementing Log Shipping	651
19	Managing Replication.....	695
20	Working with Service Broker.....	775
21	Creating Full-Text Catalogs	813

Table of Contents

Introduction	xxxiii
Hardware Requirements	xxxiii
Software Requirements	xxxiv
Using the CDs	xxxv
How to Install the Practice Tests	xxxv
How to Use the Practice Tests	xxxvi
How to Uninstall the Practice Tests	xxxvii
Microsoft Certified Professional Program	xxxvii
Technical Support	xxxviii
Evaluation Edition Software Support	xxxvix
1 Installing SQL Server 2005	1
Before You Begin	2
Lesson 1: Selecting the Correct SQL Server 2005 Edition	3
Understanding SQL Server 2005 Editions	3
Lesson Summary	7
Lesson Review	8
Lesson 2: Determining Infrastructure Requirements for SQL Server 2005	10
Identifying Minimum Hardware, OS, and Network Requirements	10
Lesson Summary	15
Lesson Review	16
Lesson 3: Using Default, Named, and Multiple Instances of SQL Server 2005	17
Installing a Default, Named, or Multiple Instances of SQL Server 2005	17
Determining When to Use Multiple Instances of SQL Server 2005	18
Lesson Summary	19
Lesson Review	19

Microsoft is interested in hearing your feedback about this publication so we can continually improve our books and learning resources for you! To participate in a brief online survey, please visit: www.microsoft.com/learning/booksurvey/

Lesson 4: Installing a New Instance of SQL Server 2005	21
Determining Service Accounts	21
Choosing an Authentication Mode	23
Determining Collation Setting	24
Lesson Summary	32
Lesson Review	33
Lesson 5: Upgrading to a SQL Server 2005 Installation	34
Determining an Appropriate Upgrade Strategy	34
Choosing an Upgrade Method	37
Determining Testing and Success Criteria	39
Establishing a Recovery Plan	40
Tips for a Successful Upgrade	40
Lesson Summary	44
Lesson Review	44
Chapter Review	46
Chapter Summary	46
Key Terms	47
Case Scenarios	47
Case Scenario 1: Installing SQL Server 2005	48
Case Scenario 2: Upgrading an Instance of SQL Server	48
Suggested Practices	49
Selecting an Edition of SQL Server 2005 to Install	49
Determining When to Install Default, Named, or Multiple Instances of SQL Server 2005	49
Upgrading a SQL Server 2005 Installation	50
Take a Practice Test	50
2 Configuring SQL Server 2005	51
Before You Begin	52
Lesson 1: Configuring Log and Data Files	53
Data Files	53
Log Files	54
Filegroups	54
How to Configure Data Files and Log Files	55

Configuring Database Files with RAID Systems	57
Best Practices	58
Lesson Summary	61
Lesson Review	61
Lesson 2: Configuring Database Mail	63
Identifying Database Mail Prerequisites	63
Understanding the Database Mail Architecture	64
How to Configure Database Mail	64
Lesson Summary	68
Lesson Review	68
Lesson 3: Specifying a Recovery Model	70
Recovery Models Overview	70
How to Configure Recovery Models	71
Lesson Summary	72
Lesson Review	73
Lesson 4: Configuring Server Security Principals	74
Choosing Between Authentication Modes	74
How to Configure SQL Server Logins	75
Managing Fixed Server Roles	77
Lesson Summary	79
Lesson Review	79
Lesson 5: Configuring Database Securables	81
Managing Database Users	81
Managing Database Roles	82
Managing Schemas	84
Lesson Summary	86
Lesson Review	86
Lesson 6: Configuring Encryption	88
Configuring the Encryption Hierarchy	88
Configuring Symmetric and Asymmetric Keys	89
Configuring Certificates	90
Lesson Summary	92
Lesson Review	92

Lesson 7: Configuring Linked Servers	94
How to Create a Linked Server	94
Configuring the Security Model	97
Lesson Summary	98
Lesson Review	98
Chapter Review	99
Chapter Summary	99
Key Terms	100
Case Scenarios	101
Case Scenario 1: Configuring Security	101
Case Scenario 2: Configuring a Heterogeneous Environment	102
Suggested Practices	102
Take a Practice Test	102
3 Creating Tables, Constraints, and User-Defined Types	103
Before You Begin	104
Lesson 1: Creating Tables	107
Understanding Data Types	107
Nullability	117
Identity	118
Computed Columns	118
Creating a Table	119
Assigning Permissions	123
Lesson Summary	126
Lesson Review	126
Lesson 2: Implementing Constraints	127
Check Constraints	127
Rules	128
Default Constraints	129
Unique Constraints	129
Primary Key Constraints	130
Foreign Key Constraints	130
Lesson Summary	136
Lesson Review	136

Lesson 3: Creating User-Defined Types	137
Transact-SQL UDTs	137
CLR UDTs	138
Implement a Transact-SQL UDT	140
Lesson Summary	141
Lesson Review	141
Chapter Review	142
Chapter Summary	142
Key Terms	143
Case Scenario: Designing a Database	143
Suggested Practices	144
Creating Tables	144
Creating Constraints	144
Take a Practice Test	145
4 Creating Indexes	147
Before You Begin	148
Lesson 1: Understanding Index Structure	149
Exploring B-Trees	149
Inside Index Levels	151
Lesson Summary	152
Lesson Review	153
Lesson 2: Creating Clustered Indexes	154
Implementing Clustered Indexes	154
Disabling an index	158
Lesson Summary	159
Lesson Review	160
Lesson 3: Creating Nonclustered Indexes	161
Implementing a Nonclustered Index	161
Creating a Covering Index	162
Balancing Index Maintenance	162
Using Included Columns	163
Lesson Summary	164
Lesson Review	165

Chapter Review	166
Chapter Summary	166
Key Terms	166
Case Scenario: Indexing a Database	167
Suggested Practices	167
Creating Indexes	167
Take a Practice Test	168
5 Working with Transact-SQL	169
Before You Begin	169
Lesson 1: Querying Data	171
Determining Which Tables to Use in the Query	171
Determining Which Join Types to Use	172
Determining the Columns to Return	173
How to Create Subqueries	174
Creating Queries That Use Complex Criteria	176
Creating Queries That Use Aggregate Functions	177
Creating Queries That Format Data by Using PIVOT and UNPIVOT Operators	178
Creating Queries That Use Full-Text Search	179
Limiting Returned Results by Using the TABLESAMPLE Clause	181
Lesson Summary	184
Lesson Review	185
Lesson 2: Formatting Result Sets	186
Using System Functions	186
Using User-Defined Functions in Queries	187
Querying CLR User-Defined Types	188
Creating Column Aliases	189
Lesson Summary	191
Lesson Review	191
Lesson 3: Modifying Data	192
Understanding Cursors	192
Creating Local and Global Temporary Tables	193
Using the SELECT INTO Command	194
Lesson Summary	196
Lesson Review	196

Lesson 4: Working with Transactions	198
Beginning and Committing or Rolling Back Transactions	198
Programmatically Handle Errors	199
Lesson Summary	201
Lesson Review	201
Chapter Review	202
Chapter Summary	202
Key Terms	203
Case Scenarios	203
Case Scenario 1: Database-Backed Authoring Application	203
Case Scenario 2: Banking Corporation	204
Suggested Practices	204
Writing Queries Against the Sales Schema of the AdventureWorks Database	204
Take a Practice Test	205
6 Creating Partitions	207
Before You Begin	208
Lesson 1: Creating a Partition Function	210
How to Create a Partition Function	210
Lesson Summary	213
Lesson Review	213
Lesson 2: Creating a Partition Scheme	215
How to Create a Partition Scheme	215
Lesson Summary	216
Lesson Review	217
Lesson 3: Partitioning Tables and Indexes	218
Creating a Partitioned Table, Index, or Indexed View	218
Partitioned Indexes and Included Columns	219
Partitioning an Existing Table or Index	220
Lesson Summary	221
Lesson Review	222
Lesson 4: Querying Partitions	223
How to Query Partitions	223
Lesson Summary	225
Lesson Review	225

Lesson 5: Managing Partitions	226
Split and Merge	226
SWITCH	227
Lesson Summary	231
Lesson Review	232
Chapter Review	233
Chapter Summary	233
Key Terms	233
Case Scenario: Archiving Data	234
Suggested Practice	234
Partitioning Tables	234
Take a Practice Test	234
7 Implementing Views	237
Before You Begin	237
Lesson 1: Creating a View	240
How to Create a View	240
Understanding Ownership Chains	242
Lesson Summary	244
Lesson Review	244
Lesson 2: Modifying Data Through Views	245
Creating Updateable Views	245
Lesson Summary	247
Lesson Review	247
Lesson 3: Creating an Indexed View	248
Prerequisites for an Indexed View	248
Query Substitution	249
Lesson Summary	251
Lesson Review	251
Chapter Review	252
Chapter Summary	252
Key Terms	252
Case Scenario: Creating Views	253

Suggested Practices	253
Creating a View	253
Creating an Indexed View	253
Take a Practice Test	253
8 Managing XML Data	255
Before You Begin	256
Lesson 1: Working with XML Structures	257
Storage Options for XML data	257
Storing XML in Text Columns	259
Storing XML in XML Data Type Columns	260
Typing and Validating XML Data with XML Schemas	262
Lesson Summary	267
Lesson Review	267
Lesson 2: Retrieving XML Data by Using SQL Server Server-Side Technologies	269
Converting Relational Data to XML	269
Retrieving XML Data from the XML Data Type	285
Lesson Summary	295
Lesson Review	295
Lesson 3: Retrieving XML Data by Using SQL Server Middle-Tier Technologies	298
Using SQLXML-Annotated XSD Schemas	299
Querying Annotated XML Schemas and XML Views from .NET	304
Lesson Summary	307
Lesson Review	307
Lesson 4: Modifying XML Data	309
Modifying XML Values and XML Structure	310
Using SQLXML Updategrams	313
Lesson Summary	318
Lesson Review	319
Lesson 5: Converting Between XML Data and Relational Data	320
Shredding XML Using OPENXML and XML Stored Procedures	320
Shredding XML by Using the XML Data Type's <i>nodes()</i> Method	327
Shredding XML by Using SQLXML	
Lesson Summary	
Lesson Review	

Lesson 6: Creating XML Indexes	334
Indexing an XML Data Type Instance	334
Creating an XML Data Type Primary Index	335
Creating XML Data Type Secondary Indexes	336
Lesson Summary	339
Lesson Review	339
Chapter Review	341
Chapter Summary	341
Key Terms	341
Case Scenarios	342
Case Scenario 1: Troubleshooting XML Performance by Choosing the Correct Indexing Strategy	342
Case Scenario 2: Handling Data as XML or as Relational Representation	343
Suggested Practices	344
Working with XML Structures	344
Retrieving XML Data	345
Modifying XML Data	346
Converting Between XML Data and Relational Data	346
Creating XML Indexes	347
Take a Practice Test	348
9 Creating Functions, Stored Procedures, and Triggers	349
Before You Begin	350
Lesson 1: Implementing Functions	352
Scalar Functions	352
Table-Valued Functions	354
Deterministic vs. Nondeterministic Functions	356
Lesson Summary	359
Lesson Review	359
Lesson 2: Implementing Stored Procedures	360
Creating a Stored Procedure	360
Assign Permissions to a Role for a Stored Procedure	363
Lesson Summary	365
Lesson Review	365

Lesson 3: Implementing Triggers	367
DML Triggers	367
DDL Triggers	371
Lesson Summary	374
Lesson Review	374
Chapter Review	375
Chapter Summary	375
Key Terms	375
Case Scenario: Creating Triggers, Functions, and Stored Procedures	376
Suggested Practices	376
Creating Functions	376
Creating Stored Procedures	377
Creating Triggers	377
Take a Practice Test	377
10 Working with Flat Files	379
Before You Begin	380
Lesson 1: Preparing to Work with Flat Files	381
Source File Location	381
Import Mechanism	381
Data Destination	381
A Best-Case Scenario	382
Lesson Summary	385
Lesson Review	386
Lesson 2: Running the <i>bcp</i> Utility	387
What Is <i>bcp</i> ?	387
<i>bcp</i> Command-Line Syntax	388
<i>bcp</i> Hint Parameter	389
<i>bcp</i> Permissions	389
Lesson Summary	392
Lesson Review	392

Lesson 3: Performing a BULK INSERT Task 393

 Differences Between *BULK INSERT* and *bcp* 393

BULK INSERT Permissions 395

 Lesson Summary 397

 Lesson Review 397

Lesson 4: Importing Bulk XML Data 398

OPENROWSET Function 398

 Lesson Summary 401

 Lesson Review 401

Lesson 5: Using the SSIS Import/Export Wizard 402

 How to Start the SSIS Import/Export Wizard 402

 Walking Through the Import/Export Wizard 403

 Lesson Summary 408

 Lesson Review 408

Chapter Review 409

Chapter Summary 409

Key Terms 409

Case Scenario: Fixing a Bloated Transaction Log 410

Suggested Practices 410

 Using *bcp* and *BULK INSERT* to Load Tables 411

 Using SSIS to Load Tables 411

Take a Practice Test 411

11 Backing Up, Restoring, and Moving a Database 413

 Before You Begin 414

 Lesson 1: Backing Up a Database 416

 Performing Full Backups 417

 Performing Differential Backups 418

 Transaction Log Backups 419

 Performing Filegroup Backups 420

 Performing Mirrored Backups 421

 Partial Backups 422

 Lesson Summary 425

 Lesson Review 425

Lesson 2: Restoring a Database	427
Restoring a Full Backup	427
Restoring a Differential Backup	429
Restoring a Transaction Log Backup	430
Performing a Partial Restore	432
Restoring a Corrupt Page	432
Restoring with Media Errors	433
Validating a Backup	434
Lesson Summary	435
Lesson Review	436
Lesson 3: Moving a Database	437
Moving a Database by Using Detach/Attach	437
Using the Copy Database Wizard	438
Lesson Summary	440
Lesson Review	441
Chapter Review	442
Chapter Summary	442
Key Terms	443
Case Scenario: Designing a Backup Strategy	444
Suggested Practices	445
Backing Up a Database	445
Restoring a Database	445
Moving a Database	446
Take a Practice Test	446
12 Using Transact-SQL to Manage Databases	447
Before You Begin	447
Lesson 1: Managing Index Fragmentation	449
Understanding Index Fragmentation	449
Identifying Index Fragmentation	451
Managing Index Fragmentation	452
Determining Which Statement to Execute	453
Lesson Summary	455
Lesson Review	456

Lesson 2: Managing Statistics	457
Understanding Statistics	457
Automatic Statistics Generation	457
Manual Statistics Generation	458
Viewing Column Statistics Information	458
Lesson Summary	462
Lesson Review	462
Lesson 3: Shrinking Files	463
Shrinking Database Files Automatically	463
Shrinking Database Files Manually	464
Shrinking the Transaction Log	464
Lesson Summary	467
Lesson Review	468
Lesson 4: Using DBCC CHECKDB	469
DBCC CHECKDB	469
Lesson Summary	472
Lesson Review	472
Chapter Review	473
Chapter Summary	473
Key Terms	474
* Case Scenarios	474
Case Scenario 1: Defragmenting an Index	474
Case Scenario 2: Maintaining Database Integrity	475
Suggested Practices	475
Managing Index Fragmentation	475
Managing Statistics	475
Shrinking Files	476
Using DBCC CHECKDB to Perform Database Integrity Checks	476
Take a Practice Test	476

13	Working with <i>HTTP</i> Endpoints	477
	Before You Begin	477
	Lesson 1: Understanding <i>HTTP</i> Endpoint Security	479
	Seven Layers of <i>HTTP</i> Endpoint Security	479
	Lesson Summary	481
	Lesson Review	482
	Lesson 2: Creating a Secure <i>HTTP</i> Endpoint	484
	Creating an <i>HTTP</i> Endpoint	484
	Specifying Web Methods	485
	Specifying WSDL Support, Schemas, and Namespaces	486
	Additional SOAP Payload Parameters	486
	Lesson Summary	488
	Lesson Review	489
	Chapter Review	491
	Chapter Summary	491
	Key Terms	491
	Case Scenario: Creating <i>HTTP</i> Endpoints	491
	Suggested Practices	492
	Creating <i>HTTP</i> Endpoints	492
	Take a Practice Test	492
14	Working with SQL Server Agent Jobs	493
	Before You Begin	494
	Lesson 1: Creating a SQL Server Agent Job	495
	How to Create a SQL Server Agent Job	495
	How to Specify a Job Owner	497
	How to Create Job Steps	497
	How to Create Job Schedules	500
	Lesson Summary	501
	Lesson Review	502

Lesson 2: Creating a Maintenance Plan	504
How to Create a Maintenance Plan	504
Lesson Summary	513
Lesson Review	514
Lesson 3: Configuring Operators	515
How to Configure an Operator	515
Lesson Summary	517
Lesson Review	517
Lesson 4: Configuring Alerts	519
How to Configure Alerts	519
Lesson Summary	523
Lesson Review	523
Chapter Review	524
Chapter Summary	524
Key Terms	524
Case Scenario: Scheduling Administrative Actions	525
Suggested Practices	526
Create a SQL Server Agent Job	526
Create a Maintenance Plan	526
Create an Alert	526
Take a Practice Test	527
15 Monitoring and Troubleshooting SQL Server Performance	529
Before You Begin	531
Lesson 1: Working with SQL Server Profiler	532
Defining a Trace	532
Starting, Pausing, and Stopping a Trace	538
Saving a Trace Log	539
Gathering Showplan Data	540
Creating a Replay Trace	543
Lesson Summary	546
Lesson Review	546

Lesson 2: Working with System Monitor	548
Creating a Counter Log	550
Lesson Summary	553
Lesson Review	553
Lesson 3: Using the Database Engine Tuning Advisor	554
Building a Workload File	556
Configuring DTA to Analyze a Workload	556
Saving Recommendations from DTA	562
Lesson Summary	564
Lesson Review	564
Lesson 4: Using Dynamic Management Views and Functions	566
Key Performance and Monitoring DMVs and DMFs	567
Lesson Summary	573
Lesson Review	574
Lesson 5: Correlating Performance and Monitoring Data	575
Basic Query Processing Architecture	575
Correlating System Monitor Data with SQL Server Profiler Traces	577
Correlating DMVs/DMFs with SQL Server Profiler Traces	578
Correlating DMVs/DMFs with System Monitor Data	579
Correlating Multiple DMVs/DMFs	579
Lesson Summary	581
Lesson Review	581
Lesson 6: Resolving Blocking and Deadlocking Issues	582
Understanding Locking	582
Understanding Isolation Levels	583
Understanding Blocking	584
Terminating Processes	585
Understanding Deadlocking	585
Lesson Summary	591
Lesson Review	592
Lesson 7: Resolving Database Errors	593
Using the DAC	593
SQL Server and Windows Error Logs	594
Lesson Summary	595
Lesson Review	595

Chapter Review	596
Chapter Summary	596
Key Terms	597
Case Scenario: Diagnosing Performance Problems	598
Suggested Practices	599
Working with SQL Server Profiler	599
Working with System Monitor	599
Using the Database Engine Tuning Advisor	599
Using Dynamic Management Views and Functions	599
Correlating Performance Data	600
Resolving Blocking and Deadlocking Issues	600
Using DAC	600
Take a Practice Test	600
16 Managing Database Snapshots	601
Before You Begin	601
Lesson 1: Creating a Database Snapshot	603
Database Snapshot Structure	603
Copy-On-Write Technology	603
Creating a Database Snapshot	605
Retrieving Data from a Database Snapshot	606
Lesson Summary	607
Lesson Review	607
Lesson 2: Reverting a Database from a Database Snapshot	609
Reverting a Database	609
Lesson Summary	610
Lesson Review	611
Chapter Review	612
Chapter Summary	612
Key Terms	612
Case Scenario: Implementing Database Snapshots for Administrative Actions	613
Suggested Practices	613
Take a Practice Test	614

17	Implementing Database Mirroring	615
	Before You Begin	616
	Lesson 1: Understanding Database Mirroring Roles	618
	Database Mirroring Roles	618
	Principal Role	619
	Mirror Role	619
	Witness Server	619
	Lesson Summary	620
	Lesson Review	621
	Lesson 2: Preparing Databases for Database Mirroring	622
	Recovery Model	622
	Backup and Restore	623
	Copy System Objects	623
	Lesson Summary	625
	Lesson Review	625
	Lesson 3: Establishing Endpoints	627
	Endpoint Types	627
	Endpoint Security	628
	Database Mirroring Endpoints	629
	Lesson Summary	632
	Lesson Review	633
	Lesson 4: Understanding Operating Modes	634
	High Availability Operating Mode	635
	High Performance Operating Mode	637
	High Protection Operating Mode	638
	Caching	638
	Transparent Client Redirection	639
	Lesson Summary	640
	Lesson Review	641
	Lesson 5: Failing Over a Database Mirror	642
	Understanding Failure Scenarios	642
	How to Initiate a Failover	643
	Lesson Summary	644
	Lesson Review	644

Lesson 6: Removing Database Mirroring	645
Removing Database Mirroring	645
Lesson Summary	646
Lesson Review	646
Chapter Review	647
Chapter Summary	647
Key Terms	647
Case Scenario: Implementing Database Mirroring	648
Suggested Practices	649
Establishing Database Mirroring	649
Creating a Database Snapshot Against a Database Mirror	649
Take a Practice Test	650
18 Implementing Log Shipping	651
Before You Begin	651
Lesson 1: Preparing to Log Ship	653
Understanding Log Shipping	653
Understanding Log Shipping Requirements	655
Lesson Summary	656
Lesson Review	656
Lesson 2: Configuring Log Shipping Options	658
How to Enable the Primary Database	658
Defining Log Shipping Backup Options	659
Scripting the Log Shipping Configuration	661
How to Configure Secondary Databases	663
Configuring the Copy Files Task	665
Configuring Log Shipping Restore Options	665
Scripting the Secondary Database Configuration	667
Lesson Summary	674
Lesson Review	675
Lesson 3: Configuring Log Shipping Mode	676
How to Configure No Recovery Mode	676
How to Configure Standby Mode	678
Lesson Summary	682
Lesson Review	683

Lesson 4: Configuring Monitoring	684
Understanding the Role of a Monitor Server	684
How to Configure a Monitor Server	685
Lesson Summary	689
Lesson Review	689
Chapter Review	690
Chapter Summary	690
Key Terms	690
Case Scenarios	691
Case Scenario 1: Providing Reporting Scalability	691
Case Scenario 2: Providing Fault Tolerance for Multiple Servers	692
Suggested Practices	692
Create a Log Shipping Configuration	692
Take a Practice Test	693
9 Managing Replication	695
Before You Begin	696
Lesson 1: Understanding Replication Types	698
Understanding Replication Terminology	698
Replication Types	701
Replication Agents	703
Lesson Summary	705
Lesson Review	705
Lesson 2: Setting Up Replication	706
How to Set Up the Distributor	706
How to Create a Publication	710
How to Subscribe to the Publication	715
Lesson Summary	729
Lesson Review	730
Lesson 3: Configuring Replication Security	731
Setting Up Replication in a Secure Environment	731
Securing Publications	732
Permissions Required by Agents	733
Lesson Summary	745
Lesson Review	745

Lesson 4: Configuring Conflict Resolution for Merge Replication	747
Conflict Resolution Basics	747
Conflict Resolution Resolvers	747
Lesson Summary	759
Lesson Review	759
Lesson 5: Monitoring Replication	761
Using SQL Server Replication Monitor	761
Configuring Alerts with SSRM	764
Monitoring Replication with System Monitor	765
Lesson Summary	769
Lesson Review	769
Chapter Summary	771
Key Terms	771
Case Scenarios	772
Case Scenario 1: Providing Local Access to Reports	772
Case Scenario 2: Providing Fault Tolerance for Multiple Servers	772
Suggested Practices	773
Creating Replication Setups	773
Take a Practice Test	773
20 Working with Service Broker	775
Before You Begin	776
Lesson 1: Exploring the Service Broker Architecture	778
Messaging Overview	778
Service Broker Components	779
Messaging-Application Interaction	780
Enabling Service Broker	781
Lesson Summary	782
Lesson Review	783
Lesson 2: Creating Message Types and Contracts	784
Creating Message Types	784
Creating a Contract	786
Lesson Summary	788
Lesson Review	789

Lesson 3: Creating Queues and Services	790
Creating a Message Queue	790
Creating a Service	795
Lesson Summary	797
Lesson Review	797
Lesson 4: Creating Conversations	798
Create a Conversation	798
Routing Messages to a Service	800
Lesson Summary	801
Lesson Review	802
Lesson 5: Sending and Receiving Messages	803
Sending Messages	803
Receive Messages	804
Lesson Summary	806
Lesson Review	806
Chapter Review	808
Chapter Summary	808
Key Terms	808
Case Scenario: Building a Service Broker Application	809
Suggested Practices	810
Configuring a Service Broker Solution	811
Take a Practice Test	811
1 Creating Full-Text Catalogs	813
Before You Begin	813
Lesson 1: Creating a Full-Text Catalog	817
How to Create a Full-Text Catalog	817
Lesson Summary	819
Lesson Review	819
Lesson 2: Creating a Full-Text Index	820
Full-Text Index Architecture	820
How to Create a Full-Text Index	821
Lesson Summary	824
Lesson Review	824

Lesson 3: Populating a Full-Text Index	825
Specifying an Index-Population Method	825
Populating a Full-Text Catalog	826
Lesson Summary	827
Lesson Review	827
Lesson 4: Querying Data by Using a Full-Text Index	828
Query Execution	828
<i>FREETEXT</i>	829
<i>FREETEXTTABLE</i>	830
<i>CONTAINS</i>	831
<i>CONTAINSTABLE</i>	833
Lesson Summary	834
Lesson Review	835
Chapter Review	836
Chapter Summary	836
Key Terms	836
Case Scenario: Building Full-Text Indexes	837
Suggested Practices	837
Creating Full-Text Indexes	838
Querying Full-Text Indexes	838
Take a Practice Test	838
Answers	839
Glossary	909
Index	923
