To my father, Dr. Karl C. Muhlbauer, whose uncommon good sense and enduring example continue to inspire me personally and professionally. He was a lifelong teacher, author of several educational textbooks, and a man to whom obstacles were only momentary distractions. We had many great adventures together, and I felt his presence quite often during the creation of this book.

Mike Muhlbauer

To Dr. Robert E. Lewis, who introduced me to this wonderful diagnostic tool we call radiology. Not only did he open the door to the most interesting playground in veterinary medicine, but as a mentor through veterinary school as well as my initial radiology training, he imparted a simple, straightforward method and thinking processes that have had a profound influence on my professional life, teaching philosophy, and general outlook. I owe any meaningful concepts that I have to his guidance.

Steve Kneller
